Passionate software engineer with extensive experience building web applications and SaaS products. Looking to help create technology that benefits people and helps businesses to grow.

WORK EXPERIENCE

WONOLO

Growth Senior Full Stack Software Engineer | Apr 2022 - Apr 2023

Typescript, Webpack, NextJS, Jest, React, Redux, Tailwind, Docker, Styled Components, Material UI, GraphQL, Firebase, Ruby on Rails, GCP, AWS, and Netlify

- Created fully customizable, auto-refreshing, small & efficiently tested web components consumable by any website with only two lines of embeddable code necessary
- Contributed to the jobs.wonolo.com application for finding curated SEO-optimized content from GraphQL source for potential users to join the application ecosystem
- Refactored the old www site into a NextJS application that's highly optimized for SEO with auto-generated static content for high performance and easy customizability, gaining 10 X user interactions and views.

MOONRISE

Senior Software Engineer | May 2019 - Mar 2022

PHP, Javascript, React, Vue, JQuery, PSQL, Twilio API, AWS, Lambda, SNS/SQS, Cloud Formation, Serverless, Docker, React Native, Material UI, Python, Tailwind, Styled Components, and CSS/SCSS

- Worked on the proprietary software to enable on-demand work for any qualified contract workers to pick up and complete.
- Created an employment I-9 verification web application with WebRTC and generated legal I-9 Verification forms for employers.
- Contributed to developing a remote call center application for workers to make phone calls to client lists with proper data attribution.

3VUE, LLC

Software Engineer | Feb 2019 - May 2019

React, Redux, Javascript, Material UI, Webpack, JQuery, and Qlik Sense

- Refactored and delivered project work to clients
- Created web mashups that consumed Qlik sense data into a usable web interface.
- Created templates/boilerplates for varying complexity using the latest React/Redux versions at the time to hasten development speed.

SPOT FREIGHT, INC

Frontend Web Engineer | Sep 2018 - Dec 2018

Javascript, React, Redux, Jquery, .NET, Typescript, Angular 1.X, CSS, and Bootstrap

- Helped refactor code, assisted fellow engineers with debugging, and launched new features and UIs to improve company performance.

DOUBLEMAP

Software Engineer I | Sep 2016 - Aug 2018

Angular 1.X, Javascript, PHP, Vagrant, JQuery, Cordova, PhoneGap, HTML/CSS, PSQL, and Heroku

- Created many new features for an app similar to Lyft or Uber
- Implemented a redesign of UI/UX from sketch mockups
- Created and managed white-label phone applications for Facebook, Apple, and Nike on the respective app stores
- Won employee of the month and 4 x fellow employee awards

NCAA

User Experience Engineer Xtern | Jun 2016 - Aug 2016

Java, Springboot, HTML, CSS, Javascript, and Bootstrap

- Updated the Dev team's style guide
- Developed two sample applications to demonstrate applying the updated style guide into an STS/Maven Java & Javascript environment.

MENTAL HEALTH AMERICA OF GREATER INDIANAPOLIS

Developer Intern | Sep 2014 - Apr 2015

Javascript, HTML, and CSS

- Created a web-based application for volunteers to use for training and testing to be certified for MHA activities.

EDUCATION

INDIANA UNIVERSITY – PURDUE UNIVERSITY INDIANAPOLIS

Computer Science - Incomplete | 2013 - 2018

PROJECTS

SIDE WORK/PASSION PROJECTS

- Mentoring new developers in boot camps.
- Designing and building gym management software as a service tool.
- Website builds for friends and family.
